130F				

**Drag Setting** - is the number of pounds of drag you have at strike on the reel. This should be 30% of the Line Weight - so 40# line will have 12# of drag - 50# is 15# and 60# is 18# and 80# is 24# - 100# is 30# and 130# is 39#. You can place the appropriate DOT where your Lever Drag is set. There are also some Blank ones if you want to use your own Pound Setting or add a Strike or Full number.

**Blank Labels** - are for your customizing Line Weight and Date that you added the line or the Type of Line and the Date. Or when to change the line or flip the Spectra over on the reel. These are Writable labels with any Standard Ink pen or Fine Marker. They will not run or smudge.

**The Pre-Printed Labels** are for Fluorocarbon Line. These are printed with the most common Line Weights and are Noted with an "F" and on the White Material to set them off different from the other OneCoolTuna Line Labels.
